

OneX

Your WAN. Your WAY.

Introducing OneX, the all-in-one solution for enhanced network security. Replace multiple devices and ensure reliable connectivity across wireless and wired networks for your business operations.

OneX prioritizes application and user-level traffic, guaranteeing 100% uptime for CCTV, Business and POS applications. It includes built-in Unified Threat Management (UTM) features like a stateful firewall, IDS/IPS, and endpoint security, eliminating the need for multiple devices.

[Learn More](#)

Improved Network Performance

Optimizes network traffic, ensuring that data is transmitted efficiently, even over long distances.

Cost Savings

Reduces the costs associated with traditional WAN solutions, such as leased lines, by using the Internet and low-cost connections to transmit data.

Increased Agility

Allows for easy provisioning and management of network resources, making it easier to scale the network to meet changing business needs.

Improved Application Performance

Enables businesses to prioritize and direct network traffic to ensure that critical applications receive the bandwidth they need to operate effectively.

Enhanced Security

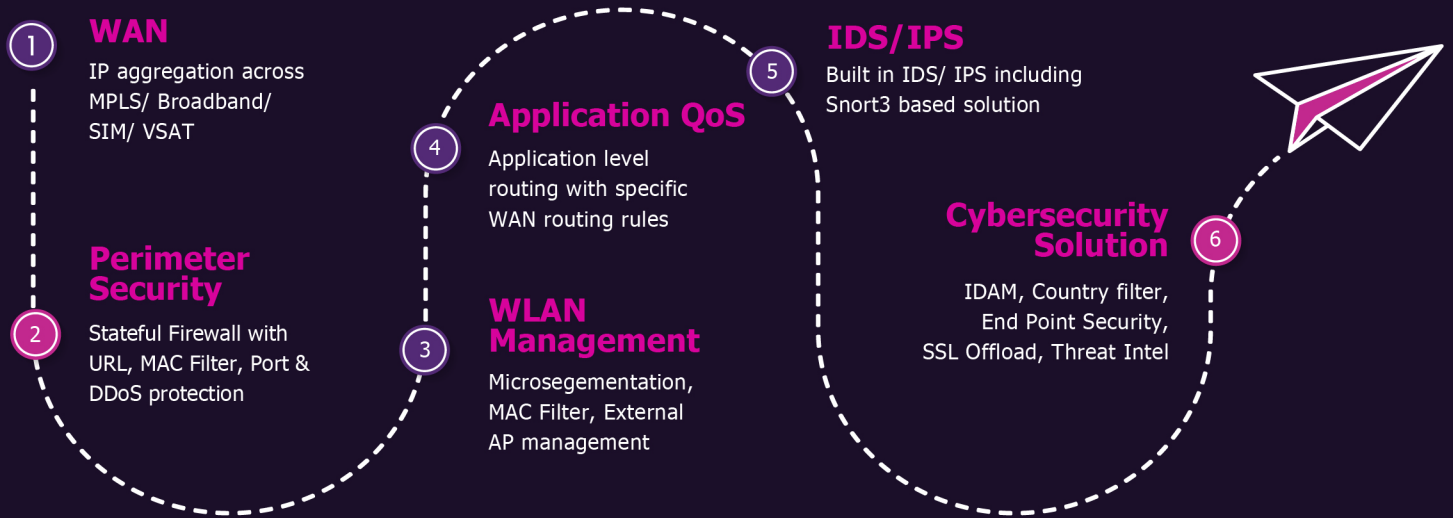

Provides built-in security features, such as encryption and firewalls, that help protect against cyber threats.

Simplified Network Management

Simplifies network management by providing a centralized control panel, making it easier to monitor and manage the network.

End to end solution components

Key Features

Packet-based Multisession Tunnel Aggregation(PMTA) between multiple server links and client links (L2 and L3)

Built in High Availability (HA): Internet and Hardware DC and DR

AES 128/256 bit per session Encryption and Compression supported **

Application aware routing, Traffic Priority and Application rate limit

Dynamic Time-based Encryption Key Rotation(Key lifetime)

MPLS over 4G (Private APN) supported

Static Route and Dynamic Path Selection**

Packet Redundancy (Packet Duplication)

Tunnel Traffic Visibility & Rate limit

Domain Based tunnel & Partial Mesh

AI-enabled Link Selection and Optimization**

Latency, Reordering & Jitter

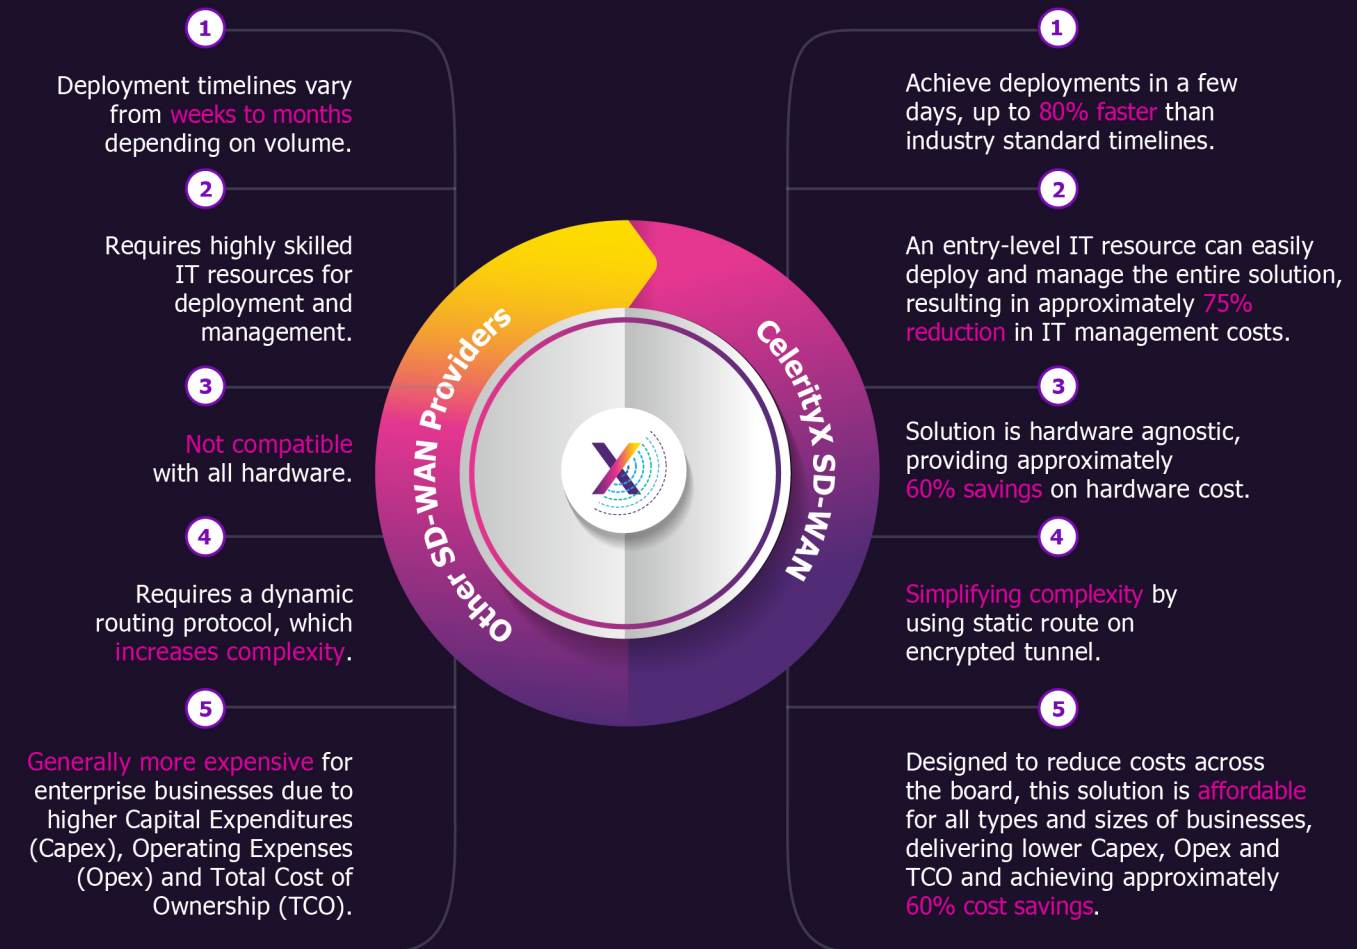

Technical Specifications by Device Model

Device Specs	GRS-XB6-12-6E	GRS-XB5-17-6E	GR8 - 52S - NSNW
Ethernet	4/5 x RJ45 ports, 10/100/1000 Mbps (Total)	4/6 x RJ45 ports, 10/100/1000 Mbps (Total)	5 x RJ45 ports, 10/100/1000 Mbps
Fixed WAN	1	1	1
Fixed LAN	1	1	1
Flexi Ethernet	2/4	2/4	3
4G LTE SIM Slots	NO	NO	NO
